

MAPPING PUBLIC SPACES

<http://www.peripato.net>

The images and text that appear on this web site have been contributed by local participants using a mobile phone. The images are sent using MMS and the text using SMS whilst exploring public spaces on foot.

The intention is to create a montage that in some way represents your region, a type of 'map' or social cartography.

The public is invited to make contributions. All that is required is a mobile phone with MMS and/or SMS capabilities, and time to go for a walk.

To contribute send your images or text to **0401 062 326**. Please be aware that all contributions will be screened, as it is not permitted to show images of people without their consent nor images that may be deemed offensive.

For any further info please contact: giannis.greg@gmail.com

Instructions

1. Take a map and this instruction sheet.
2. Go for a walk (or many walks). Mark the route that you take. On the way you are required to take images using your phone and send them using MMS to **0401 062 326** with the **subject line "sb"**. You can also send SMS messages to this number. Once approved they can be viewed in the gallery and online.
3. It is better to take pictures of small details as these get compressed when they are sent via MMS, so any fine details are lost.
4. Enjoy your walk!!!
5. Return the marked maps to the gallery. Please include your name and mobile number so that we can track participation. These will be placed on the gallery wall (minus your mobile number). Once received, we can approve the images/text you have sent.
